Anti-Saloon League to Move for Only One Dispensary in a County.

(Special to The Times-Dispatch.)
RALEICH, N. C., November 28.—Governor Aycock has granted a pardon for Javan Long, who is serving a seven-year sentence for the killing of E. S. Pell, in Macon county, in November, 1902. There were two trials, the jury falling to agree on a verdict at the first, and the Governor says that after a careful study of the evidence he is satisfied that the killing was in self-defense. He killed Pell at the latter's store, after Pell had opened fire on him and had assablted Long's

In the fall of 1895 Leontracted that fearful disease, Blood Poison. It gained such headway that I was forced to resign my position and seek relief at Hot Springs, After spending all the means I had I went to Memphis. In less than three weeks of suffering I was discharged as cured. In less than a month every bone in my body seemed to be affected and felt as if they would break at the least exertion. Again I was compelled to resign, and I returned to the hospital for a seven weeks stay. When I came out I was advised to try farming. When I first went on the farm I prevailed on the only firm who handled drugs to get me one dozen bottles of S. S. At that time both of my hands were broken out with bils and sores. In the meantimenty drupgist had gotten two dozen bottles of S. S. S. for me and I began its use, and after taking the thirteenth bottle not a sore or boil was visible. R. B. Powell.

W. N. Jones, president of the North Carbina Anti-Saloen League, and chairman of the Board of Managers of the Raleign dispensary, is advocating the idea of amending the Watts law so that there can be only one dispensary in each county. He says in some counties where rival towns exist there are tendencies for each to have a dispensary so that one may not get ahead of the other. He thinks the county seat should be the location of the dispensary.

pal Tribunals.

In the Chancery Court yesterday H. L. Denoon qualified as administrator of the estate of the late J. B. Lambert, which is valued at \$33,000. In the Supreme Court the demurer submitted by the Armstrong interests in the Maybrick suit was argued and taken under advisement by Judge Griman.

In the Circuit Court, the following judgments were rendered: J. W. Atkinson vs. J. R. Lee, \$40,53; Neill O'Donnell vs. the Richmond Flour and Feed Company, \$50, Atkins Jeffries was given three years in the Hustings Court for house-breaking The case of Calvin H. Moore, who is charged with murder, was set for December 12th.

Deeds Are Recorded.

A deed has been recorded in the Chancery Court by the American Olgar Company conveying to the American Tobacco Company the factory property fronting 272 feet on the north side of Cary Stree, between Twenty-fifth and Twenty-sixth Streets, and running back 185 feet to an alley. The property was recently conveyed to the American Cigar Company, and the latest transfer is simply a reconveyance.

and the lavest veyance.

Another deed in the same court reconveys from the British-American Tobacco Company to the American Clear Company the property on the north side of Cary Street, 185 feet 6 inches, at the intersection of Twenty-fourth Street, and running towards Twenty-fith Street, with a depth of 157 feet, and the assessed value of which is \$23,900.

Brothers Marry Sisters.

A double marriage ceramony was performed by Rov. R. B. Beadles, of Fairmount, in his poriors, Sunday. The contracting parties were two brothers and two stitters—Mr. A. L. Henley and Miss Done B. Profitt, and Mr. R. J. Henley and Miss Addis F. Profit, all of Goochland county, where the two brothers are popular young farmers. Strictly Business.

A man prominent in financial circles in New York tells of a conversation between Russell Sage and a Bostonian whom the gentleman first referred to had introduced to the veteran financier. "I have always made it my rule," said the man from Boston "never to think of business analiss out of business hours." Mr. Sage smiled grimly. "That rule may work in Boston." he replied in his mild way, "but it would not succeed in New York. Here, my dear sir, you would soon find out that you were doing business with persons who did."

In Darkest Africa.

In Darkest Africa.

Bishop Cyrus D. Foss, of Africa, tells an interesting story of a definition of an engine first seen out a rathread in the Dark continent by a strong nagro. "It is great from horse. He has one eye (the headilght). He feeds on life. He doesn't like to work, and screams when the white man urges him. He gets the favor often and has to have oil poured on his joints. Nobody knows where he came from or where he is going.

The Straight the Only Way. It is calculated that one right angle bend in a pipe through which water flows will make necessary nine per cent more pressure for a given flow than is required for a straight pipe of like size and structure. With three sharp bends at right angles the pressure needed is thirteen per cent more than that which is used in a straight pipe.

### LOCATES ORE BY MEANS OF MACHINERY

American Named Daft Invents Wonderful Apparatus.

(From Our Regular Correspondent.) WASHINGTON, D. C., November 28 .-An American of the somewhat significant name of Daft has invented an ore finder which is creating considerable at-tention in England and on the continent t is said by James Boyle, the American consul at Liverpool, that the finder has been very successful in locating lodes, ecfs and strata of iron ore in England. Mr. Boyle sends the following from the London Telegraph concerning the appa-

London Telegraph concerning the apparatus:

"The apparatus by which this result is rendered possible is the invention of Mr. Leo. Daft, an American, and Mr. Williams, an Englishman. It is extremely ingenious, and in the hands of experts admits of the most delicate manipulation. The essential principle of its working is that it emits not a continuous current, but a series of little, short, sharp impulses. These will go forward in all directions, and when they meet with quartz rock or metallo lodes the waves are so modified that the listener can form a judgment where the ore bodies causing the variation of sounds are situate. \* The Barrow Hematite and Steel Company made a trial of the electrical ore finder. \* The apparatus indicated the position of the deposits, and this was gone so accurately that when the Barrow Company put down a bore hematite was found at about the depth adjudged, and the discovery is likely to prove of great importance. In a similar way, with variously attuned apparatus, gold has been located in Alaska, and Siberia, lend in Wales, copper in Cormetals we have named in various parts."
